

Advanced Training Position - Full Time.

Albury-Wodonga Hospital

Albury-Wodonga Hospital has recently received accreditation by RACP for Advanced Training in Geriatric Medicine. This came through too late for the site to participate in the centralized match.

Albury Wodonga Health serves a catchment of over 250 000 people, serving the 'twin cities' of Albury in NSW, Wodonga in Victoria and surrounds. It is unique as a cross border health service, although administered as part of the Victorian Health system. It is Victoria's second largest regional health service. In terms of geriatric medicine, Albury Wodonga Health offers Geriatric Evaluation and Management, Orthogeriatrics and Geriatric Consultation. Outpatient clinics includes Cognitive Dementia and Memory Service, Falls and Balance, and General Geriatrics. There is Geriatric Medicine input into ambulatory subacute services.

Albury-Wodonga Hospital will participate in VGMTP.
