

## Centralised Match for Advanced Training in 2022

Update: 10<sup>th</sup> August 2021

VGMT will send regular updates during the second-round match.

These updates should be read in conjunction with the “Second Round Match – Overview”.

All updates can be found on the [VGMT website](#).

### **A. Advanced Trainee Matches**

Geriatric Medicine will be participating in a multispecialty match that includes cardiology, gastroenterology, medical oncology, nephrology, and respiratory & sleep medicine. An applicant can apply to multiple specialties and multiple health services in this match but can only be matched once. In addition, there are other matches being held concurrently including endocrinology, infectious diseases, rheumatology, and some interstate matches. You could inadvertently be matched twice if you participate in one of the concurrent matches as well as the Geriatric Medicine match.

To participate in the match for Geriatric Medicine you are accepting that the result of this match is binding.

If you do still wish to participate in a concurrent match as well as the Geriatric Medicine match, please seek advice of the Director of Geriatric Medicine (or site coordinator) at the health services where you are applying.

### **B. When will the interviews be held?**

Health services make their own arrangements for interviews. They are not coordinated by VGMT.

Some health services run their own interviews, while other health services run combined interviews with other health services.

Please contact the Director of Geriatric Medicine (or site coordinator) of the health service for more details.

Best wishes

Benny Katz  
Director, VGMT
